

The traffic and weather channels need to stay and are a benefit to the xm customers. We are the ones who pay for the service so why shoudln't we receive it. I have used to stations many times while driving in my car. In one instance I was even able to avoid a huge traffic jam/accident while driving thru the DC area. Taking away these stations would be like taking the weather channel off TV...it's Oreos with out the milk! We can't have people driving around with a mouth full of cookies and no milk to wash them down with now can we? So Please, reconsider and know that XM Radio is the best thing since sliced bread...and whatever was the best thing before that, too.
